ALLRIVIEL

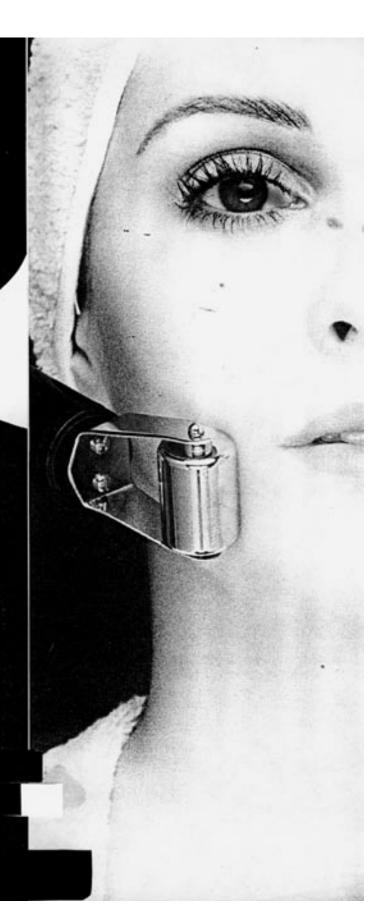

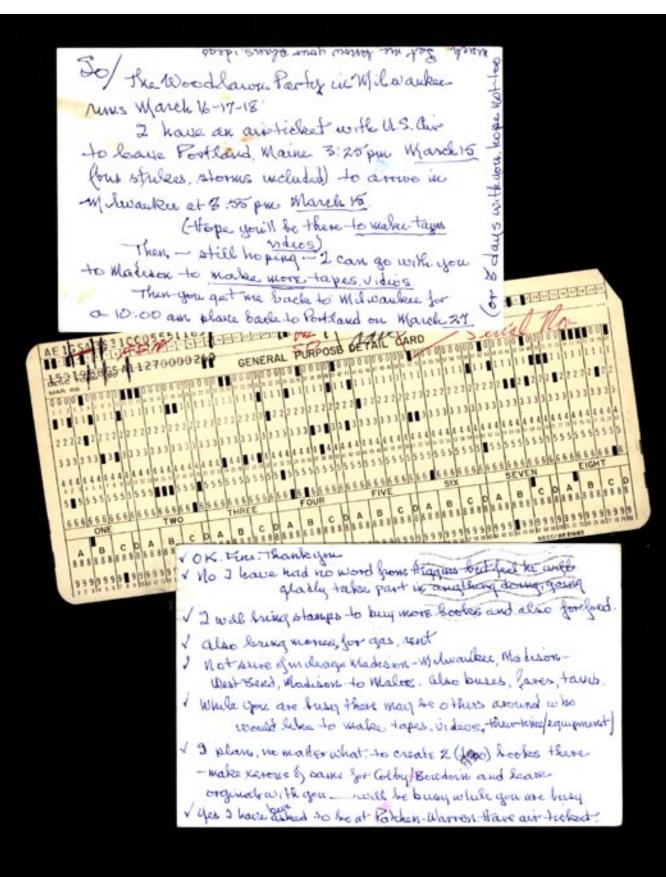

PALLE

BORHOOD!

St LOOK...

The vitamin that lowers cholesterol. Are you getting enough of it? See PAGE 11.

Foods that can unblock your arteries. Yes, it's true! Don't miss PAGE 21.

Oatmeal beats other fibers in lowering cholesterol. Its fiber surrounds cholesterol molecules and carts them away.

Garlic may lower levels of cholesterol in the blood. One study showed that frequent garlic eaters had levels 23 percent lower than those that are none.

- * "In Dr. Farquhar's studies (the food substance on PAGE 23) lowered cholesterol more substantially than (even) fish oils..."
- * The only two cooking oils that are actually "cholesterol-safe." PAGE 23.

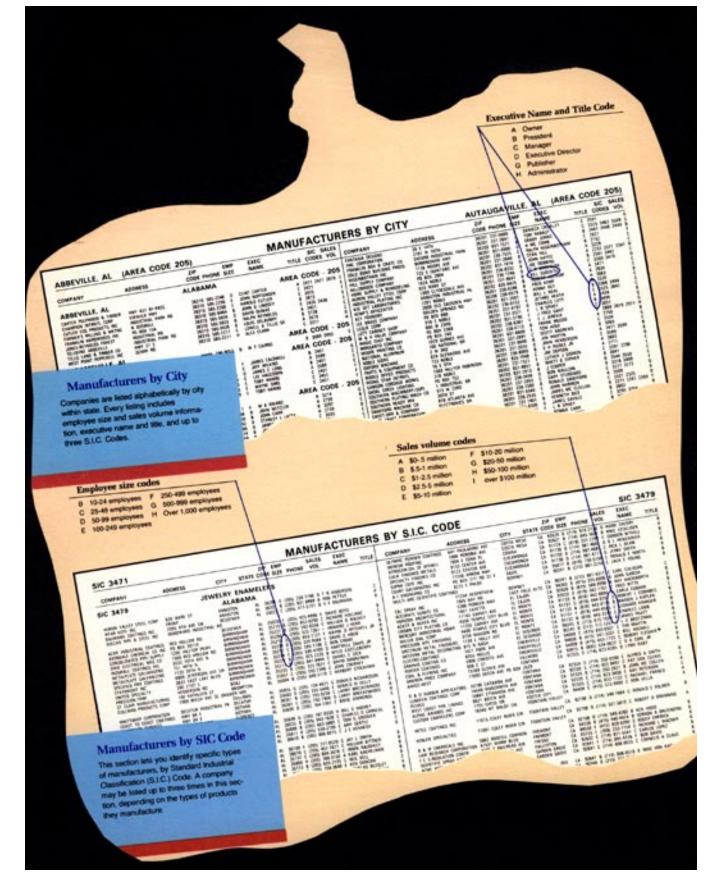

ON PAGE 9: Why fat—not calories—makes you "fatter" than any other foods.

PAGE 27: Which part of the ken has the *least* cholesterol? (*HINT*: also the most delicious!)

PAGE 10: Which fish are lowest highest) in cholesterol? (Don't ss this!)

Shrimp may have some cholesterol, but it also has a good amount of omega-3 fatty acids known cholesterol fighters

- How to TRIGGER a life-saving response during a severe allergic reaction. PAGE 57.
- This TRIGGER tells your "Immune Response" to "kill cancer cells." PAGE 89.
 - How to TRIGGER accelerated healing of cuts, wounds, bruises-even surgery! PAGE 105.
 - A simple mental TRIGGER to conquer the negative emotion that kills your "Immune Response." PAGE 119.
 - Which exercises and physical activities TRIGGER the most vigorous "Immune Response?" PAGE 151.
- This TRIGGER blocks the outbreak of herpes symptoms (which doctors say over 70 percent of us may already have!). PAGE 170.
- · Positive mental commands that TRIGGER the healing power of your "Immune Response." Try them for yourself. On PAGE 177.
- This TRIGGER reduces the length of your flu suffering by 50 percent! See PAGE 189.
- These TRIGGERS (PAGE 213) reverse the damage and deterioration done by the aging process!
- This particular vitamin TRIGGERS a tremendous boost in infection-fighting immune power! PAGE 214.
- "Anti-TRIGGERS" that double your chances of breast and cervical cancer. Avoid them! PAGE
- TRIGGER natural pain relief! PAGE 269. You may never reach for aspirin
- TRIGGER deep, rejuvenating sleep. Utterly natural! PAGE 288.
- This TRIGGER heals ulcers in just two weeks-for less than \$30! "Seventy-five percent of the patients were completely cured." See

- TRIGGER warts to vanish. Works better than any medical treatment! PAGE 311.
- TRIGGERS that turn off yeast infections! PAGE 318.
- The Number One anticancer TRIGGER. PAGE 212.

- The mosquito bite that can kill you. PAGE 133.
- Why you should NEVER eat the food if the chef smokes cigarettes! PAGE 160.
- Should you get a flu shot this year? ABSOLUTELY! See why, on PAGE 189.
- · Studies confirm: Left-handed people suffer more autoimmune diseases than the rest of us. How to compensate, on PAGE 199.
- · What's wrong with U.S. pork? (It's so infected, European and Asian countries have banned it.) See why on PAGE 224.
- . Why "pregnant women should NEVER change the cat's litter box." (PAGE 226.)
- · Why chemistry professors have high rates of cancerand what that says about the air you breathe. PAGE 239.
- The 10 most dangerous occupations for your immune system. PAGE 241.
 - How stress "shell-shocks" your immune system and causes disease. What to do, on PAGE
 - What's behind such medical mysteries as "spontaneous remission" and the "placebo effect?" The "Immune Response" researchers now reveal it. See how to TRIGGER your "Immune Response." PAGE 122.

B. Automatic smoking system teatures have construction and ingerious design. Load the snap-out storage chamber with your smoking matter and enjoy 25–30 generous bowls without the mess of ashes, excessive smoke, or looking for a match (lighter is built-in). A super easy-to-use smoking toot. Treat yourself (or loved one) to the best #91529 \$24.95

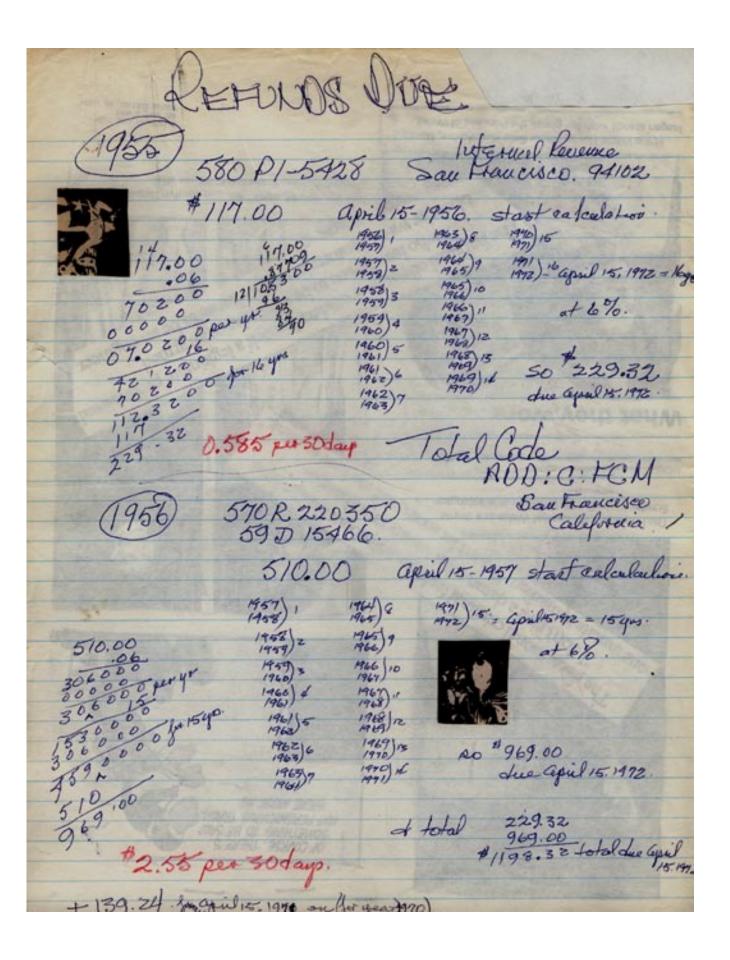

C. D. E. Chamber pipes minimize escaping smoke & indicting nearby non-smokers. Unaffected by wind once it & also eliminates falling others. Available in 3 versions, from the extra-deluse rosewood chamber to the basic classic. C. #91083 56.95; D. #91085 53.95; E. #91081 54.95

F. Sleek Teak offers the dual convenience of a handy storage compartment and a smoke-thru cap over the smoking bowl. Pocket sized. #91045 59.95

The Almanac

Today is Wednesday, March 21, the

285 to follow in 1962.

The moon is full.

The morning star is Saturn.

The evening star is Venus,

On this day in history:

In 1790, Thomas Jefferson became the first U.S. secr state.

In 1918, American and German soldiers were engaged in battle of the Somme.

In 1945, about 7,000 Allied airplanes dropped 12,000 tons of explosives on Germany in full daylight.

In 1946, the United Natices moved into temporary headquarters at Hunter College in New York City.

A thought for the day: Thomas Jefferson said: "Delay is preferable to error,"

Birth Of The Cabanas

Issuance of a building permit for the Roney Plaza Hotel to repair damage to its cabanas from the recent heavy surf is a reminder of the Roney's role in changing the whole mode of seashore resort life.

It was at the Roney Plaza where cabanas made their advent on the American continent. When the late N. B. T. Roney erected the great hotel he included the stretch of cahanas along the beach. But they were not fully promoted and adequately introduced until the late Henry L-Doherty owned the property.

Impact of cabanas on resort life has been fantastic. It was the cabana that lifted smart society out of the drab and homely bath houses and lockers. No longer did a surfbather run drippingly to and from the bath house in a bathing suit. The custom of lounging that came with the cabanas brought out the sansuits and playsuits. Beach fashions became important.

Gaining popularity alongside the cabanas was the pooldeck. Often the habitue never goes near the water, being content to loll on a pad or to play canasta. Here again fashions are important. Vacation customs and manners have become molded by the cabanas and pooldecks right here in Miami Beach. Popularity of these institutions spread years ago to the other watering places of society; thus the surf and pool crowds here have set the pace for America's present-day version of the old swimmin' hole fun.

Everybody's Grace

Grace Kelly was beloved by millions before she wed Prince Rainier of Monaco. She had been in the ascendancy as a film actress; her roles had been sympathetic ones and she was riding the crest of popularity when the handsome young man of roulette royalty wooed her and whisked her his playhouse kingdom on the Riviera.

FEATURES

- Completely Menu Driven, No programming required
- Continuous acquisition and playback:
 Sample rates up to 55kHz, up to 32 input channels
- Difference Equations: provide for complete math, signal arithmetic, & signal manipulation capabilities - operates on entire waveforms - can generate arbitrary waveforms
- High speed FFT processing (1024 point, 50mS to disk)
- · Wide range of display formats:
 - Dual-Channel Digital Oscilloscope,
 - Real-time Spectrum Analyzer,
 - 2-D & 3-D Spectrographic, Pole-zero,
 - Unwrapped Phase, Group Delay, Linear/Log
- Convolution, & Autocorrelation
- Classical & arbitrary FIR/IIR filter design
- Signal editing Cut & Paste capability
- On screen context dependent Help Facility
- Compatible with DATA PROFESSIONAL analog I/O Hardware
- PCI-20207K-4, DSP Pak, includes both Hardware and Software

APPLICATIONS

- Data Acquisition
- Speech Analysis
- Spectral Analysis
- Fast Fourier Transforms
- Transient Analysis
- Digital Filtering
- Automotive Testing & Simulation
- Biomedical Signal Analysis
- Vibration Analysis
- Automatic Test Equipment
- Waveform Generation
- Communications Channel Evaluation

DESCRIPTION

Hypersignal-Workstation products provide a ne level of support for digital signal processing (DSI applications. The extensive menu-driven facilitic allow any scientist, engineer, physician, or othe researcher the ability to acquire, analyze, displa modify, generate, and output intricate signa (waveforms). The software (PCI-20210S-1 complements the growing family of low cost "DAT. PROFESSIONAL" data acquisition hardware for IBM compatible PCs. Control of all analog input and output hardware functions is fully integrated with the software's comprehensive signal manipulation and presentation capabilities. In addition, data file from other sources can also be imported for analyst and display purposes, Graphical tools are include

A. Atherosclerosis, or hardening of the arteries, begins with a striped patch on the inside wall of the artery.

B. Like so many ants on a fallen morsel of sandwich, bits of cholesterol and other substances in the blood congregate on the patch.

C. These substances harden and thicken, narrowing the artery and limiting the flow of blood.

MEDI FO

THE BE-YO CATA 1990

They Are:

- Cigarette smoke from others. (How to undo the damage: PAGE 29.)
- Alcohol. Yet, surprisingly, this modest amount (on PAGE 32) is actually good for you!
- Allergens. (Incredibly, eating onions may be your savior: PAGE 65.)
- Fear, anger, loneliness. (These make you "five to seven times more likely to die." See PAGE 121.)

- Solar rays. (Your best protection isn't a sunscreen! See what is—on PAGE 243.)
- * Household and garden chemicals. ("Silent poisons," listed on PAGE 230.)

- Air pollutants. (Each breath cuts your life short! How to counteract their ill effects: PAGE 241.)
- Stress. (A serious killer. But this simple relaxation exercise will "neutralize" harmful stress hormones: PAGE 259.)
- Sleeplessness. ("Beauty sleep" for your immune system: PAGE 288.)
- Perfumed toilet tissue. ("Women, especially, become infected." How to beat the yeast beast: PAGE 318.)

connections while protecting the field wires and making installation easy to accomplish. In addition to each pair of I/O terminals on the analog panels, an extra, "programmable" terminal is also provided. These can be individually jumpered to "+V", ground, or any other user defined point. This feature is very useful in applications involving shields, external excitation, lead wire compensation, etc. Each digital I/O point has its own ground terminal. All panels also have separate terminal connections for an external power supply (+V) if needed.

The termination panels and card cage conform to the Euro-standard "3U" size and are compatible with many existing components. The wide variety of panels makes them ideal for interfacing most analog and digital inputs/outputs signals. Provisions for thermocouples and for "high density" connectors are included.

Burr-Brown's Euro components are suitable for end-user, OEM, VAR, and system integrator projects. They can be used in conjunction with PCI or other data collection and control products. There are a total of seven Euro-style panels. Of these, four panels are optimized for analog applications, while the others are intended for digital functions. Two of the analog panels have high-density connectors (PCI-20304T-1, -2) for use with the multifunction "carriers". These models can simultaneously accommodate both the analog inputs and outputs of the PCI-602W. The additional analog panels (PCI-20303T-1, -2) support the "modules" "boards" of the PCI-20000 system. thermocouple measurements the PCI-20303T-2 and PCI-20304T-2 panels include the necessary cold-junction compensation (CJC) circuitry. The CJC function is optionally activated with jumpers. When CJC is selected, one differential channel (Channel 0,8) is utilized for this purpose.

Digital applications involving conventional or high density connectors are accommodated by the PCI-20305T-1 and PCI-20306T-1 respectively. When the PCI-20306T-1 is used with a multifunction carrier the 16 terminals/signal conditioning spaces can be shared between digital I/O, handshaking, counter, burst generator, and external interrupt functions. To utilize all of these functions simultaneously, a special panel known as the PCI-20307T-1 can be used to add additional channels to the PCI-20306T-1. The PCI-20307T-1 includes a short umbilical cable which interconnects to the PCI-20306T-1 in an adjacent mounting slot.

The PCI-20308H-1 is a standard 3U size card cage constructed from lightweight extruded aluminum. It is designed for installation in either a table-top or 19 inch rack mount configuration. When not needed, the rack mount "ears" can be detached. Termination panels are easily installed and removed. They slide along card guides that insure alignment with the mating connector at the rear of the cage. Depending upon the height of optional components that may be installed on the termination panels, up to 20 panels can fit into one card cage. This accommodates up to 320 channels in a single, 5.25 inch (13.3 cm) high, rack space. Panels are securely held in place by individual, finger operated, card locks. Included with the PCI-20308H-1 is hardware for five panels (5 pairs of card guides, 5 card locks, cable/connector mounting screws). Additional mounting hardware is available in the PCI-20309A-1 Termination Panel Mounting Kit. Each kit includes 5 pairs of card guides, 5 card locks, and 15 cable/connector mounting screws.

Signal connections between a given termination panel and an I/O port (on a carrier, module, or board) are accomplished with an easy to use ribbon cable. Twelve different cables are available for different functions and applications. Please see Table 1 for compatibility information. All cables are shielded to reduce noise pickup and radiation. The shield is connected only at the "computer" end to avoid ground loops. This end is clearly marked. In addition to using keyed connectors on both ends of the cables, a distinctive key is used on each type of panel/cable group to minimize the possibility of 'mixed" assemblies (ie: a digital panel connected to an analog cable). Lengths vary from 1.5 feet (46 cm) to 6.6 feet (2 M) depending upon the model number. See the Specification Table (Table 2) for more details.

Both boards offer the same I/O capabilities with the exception that only the PCI-602W has analog outputs. On the PCI-602W, analog signal generation and closed loop control are supported by two high speed, high resolution, analog output channels. The ±10 volt range and 16-bit resolution provide for output step changes as small as 0.3 mV. Both channels can be operated under program or DMA control. Full scale output changes can be sustained at speeds up to 250kHz.

The digital sections of the boards contain the computer bus interface circuitry, 16 channels of digital I/O, a programmable burst/rate generator and 2 general purpose counters. The crystal controlled burst/rate generator is very useful for establishing an accurate and dependable timebase for data acquisition. In addition to generating continuous clock rates in the range of 0.002Hz to 2MHz, the user can program bursts of pulses. Using this feature, a desired number of pulses can be generated with a specified pulse spacing and an independent repetition rate. This innovation makes it practical to perform high speed acquisitions ("simultaneous" readings) of multiple channels at programmable repetition rates.

The two 16-bit counters can be used separately or they may be used in combination to form a 32-bit counter. Typical operations include event counting and dividing as well as speed, frequency, pulsewidth, and period measurement. Also, the counters can be configured to produce a variable duty cycle generator. The counter's separate clock, gate and output connections have independent programmable active-high/low states. Input rates up to 16MHz are supported.

The 16 channels of TTL compatible digital arranged in two byte size ports (8 channels that can be programmed for either input use. In addition, all outputs are buffered handshake and interrupt capabilities are a Data transfer rates of 250KBytes/second achieved. At "power-up" the ports are au placed in the input configuration.

Separate keyed "bulkhead" connectors and for both the analog and the digital signals, insure that digital signals do not expected the analog signals. Extern connections are conveniently located on support bracket where cable connections made without opening the computer. Or ribbon cables and termination panels are avoid to further facilitate external connections, include the traditional PCI-20024T-1 (analog the PCI-20025T-1 (digital) panels, as well as the EURO-STYLE panels. The PCI-20304T sepanalog and the PCI-20306T-1 and PCI-2030

digital applications comprise the compatible Euro panels. Termination panels provide convenient screw terminal blocks for fast external connections. Each panel also has ample space for the user to install custom signal conditioning networks including anti-aliasing filters, amplifiers, voltage dividers, surge suppressors, etc. Compatibility between the various termination panels, cables, and boards is described in Table 1. Please note the PCI-602W (with analog output) requires the PCI-20304T series of termination panels. PCI-20008A-1 (analog) cable along with the PCI-20009A-1 (digital) cable complete the connection between the termination panels and the multifunction I/O boards. Additional information on compatible members of the PCI termination family can be found in the PCI Handbook of Personal Computer Instrumentation and in the EURO-style Termination System data sheet. All interconnection components are keyed to prevent incorrect assembly.

Optional software drivers are available offering a wide range of capabilities in several programming languages. These include the PCI-603S (BASIC), PCI-604S (C), and PCI-605S (TURBO PASCAL). The PCI-606S is a combination package that includes drivers for all three languages at a reduced price. Software drivers provide a clear and consistent, high-level interface to the board. They "insulate" the programmer from the particulars of the hardware, allowing code development by people not experienced in electronics. Complex sequences are reduced to simple "call" statements. The driver

support all I/O functions including high readings and DMA. Built-in calls can ncy, period, pulsewidth, counts, and RTDs. Output functions pulse, burst, and digital pattern

Blotting News

NC The nitrocellulose membrane cited by Southern for transfer of nucleic acids, Grunstein and Hogness for colony hybridizations, and Benton and Davis for plaque lifts. This membrane is available in rolls, sheets and surfactant-free pre-cut discs.

Immobilon-P a versatile protein blotting membrane made of PVDF (polyvinylidene fluoride). This membrane demonstrates superior retention and low signal to noise ratios. It has successfully been used in a variety of key applications including: standard Western blotting, direct microsequencing, reprobing, in-situ chemical cleavage/proteolytic digestion, on-membrane amino acid analysis, dot immunoassays, cell blotting, and HIV detection.

Immobilon-N a cationically-charged, PVDF membrane is now available for Northern and Southern blotting. Improve signal while reducing the variability commonly seen with nylon membranes. The mechanical strength of this membrane makes it ideally suited for RFLP studies that involve multiple reprobings.

Equipment to complement the Immobilon family of transfer membranes, offers a full line of blottina equipment which includes the unique well as the

For further intermation

View proteins without staining! Due to the hydrophobicity of the Immobilon-P transfer membrane, proteins can be detected using a new technique called transillumination. When an air dried Immobilon-P blot is placed in 20% methanol, proteins appear translucent against a whitish-grey background. The sensitivity of this detection method is equal to that seen with Coomassie Blue staining. This technique is especially helpful when proteins are to be sequenced. Reig, J. and Klein, D.C., Applied and Theoretical Electrophoresis (1): pp 59-60, 1989.

Enhance sensitivity 100-fold! Yes, this is true! A recent publication revolutionizes blotting to Immobilion-P. "Visualization and/or photography under UV light of 4-chloro-1-naphthol-developed, peroxidase-labeled immunoblots allows an increase in sensitivity of more than 100 times." The 4CN staining procedure is unchanged except for substantially shortening the time from 3-6 hours to 20 minutes. Due to lower UV absorption of PVDF, Immobilion-P is ideally suited for this application. Domingo, A. and Marco, R., Analytical Biochemistry, (182): 176-181, 1989.

Reprobe 1251 labeled Western blots! Dr. Greg Silverman of the Scripps Institute describes a technique to strip and reprobe blots simply and efficiently. This procedure may be repeated up to 8 times.

Detect picogram quantities of protein! A recent publication describes an immunodetection technique that yields picogram sensitivity of proteins blotted to Immobilon-P. This protocol involves silver enhancement of a gold conjugated streptavidin-biotin Western blot

eatment

Faucet-Mounted Eye Washes

Chrome-plated brass eyewash units attach directly to existing faucets, yet still allow normal use. Simply pull actuator pin to deliver a soft, aerated stream of water in wide flow to the eyes and face (No. 8253) for standard faucet or (No. 8270) for gooseneck lab faucet or concentrated flow to the eyes only (No. 8252). A minimum 15 psi water flow holds the wash unit on, leaving hands free. All fit any standard 3/4" x 27 male thread faucet and include 15/16" x 27 thread and 13/16" x 27 thread adapters. All meet applicable ANSI Z358.1-1981 standards.

6 October 1984

Thank you for giving us an opportunity to read your manuscript, Motherine Time. I am afraid we weren't able to find any portion that was readily exceptable.

I wish you luck in finding a prace for it, lenjoyed reading it.

Sincuels, Deborah Balen

Contributing Editors: Edouard Roditi (PARIS); Walter Abish, Guy Davenport, Kenneth Irby, Ann Lauterbach, Nathaniel Tarn (USA)

BERN PORTER

is an artist who in the back ground is a scientist and as such, his achievements read like a What's What' of modern physics: he participated in the Manhattan Project (resigning the day after Hiroshima was destroyed, seeing his "contributions misused, turned 82% bad."); the space program, and the invention of television. As an artist, he had his first solo exhibition in 1940 while working on the separation of uranium at Princeton University. Among scientists, only Buckminster Fuller equals him for art audacity in looking at the shape of every house and car and food system and saying. Let's do it over. Better. Head to toe, By observing the laws of physics, Porter arrived at many of the same conclusions as the Futurists, Dadaists and Constructivists — working to reintegrate art and life. He has published over 60 books of his own work, and was the first American to publish works of Kenneth Patchen, Anais Nin, and Henry Miller. He maintains that "the fusion of the science molecule with the art molecule would save the world."

What's in a Numb

A lot, to many Lotto pla include, in every issue. News Release* the Ny are Drawn Charts for Lotto 6/40.

Most Lotto play
sets of personal lucky nume
computer choose them and win a
the Jackpots. It is also true that some Jac
winners choose their selections by using the
charts. Their selections are based on
mathematical and relative probability they
extract from these charts.

One system used is by selecting neighboring pairs of frequently drawn numbers, such as selections like 13, 14, 15, or 37, 38, 39 and then completing their selections from other frequently drawn numbers.

Model#	Туре	Price	Description
PCI-501H-1	Work Station	11,995	PCI Work Station (110 VAC).
PCI-501H-2	Work Station	11,995	PCI Work Station (240 VAC)
PCI-601W	PS/2 Board	995	Multifunction I/O board for PS/2 (microchannel) computer.
PCI-602W	PS/2 Board	1195	Multifunction I/O board with analog output for PS/2 (microchannel) computer.
PCI-603S	PS/2 Software	180	Software drivers, BASIC language, PS/2 interface for use with PCI-601W and PCI-602V
PCI-604S	PS/2 Software	180	Software drivers, C language, PS/2 interface for use with PCI-601W and PCI-602W.
PCI-605S	PS/2 Software	180	Software drivers, Turbo-Pascal language, PS/2 interface for use with PCI-601W
1.71.71.71.71		577.0	and PCI-602W.
PCI-606S	PS/2 Software	340	Combination software driver package (includes one each PCI-603S, PCI-604S, and PCI-605S) for use with PCI-601W and PCI-602W PS/2 boards.
PCI-1101	Isolator	15	AC/DC input opto-isolator (15-32V).
PCI-1102	Isolator	15	AC/DC input opto-isolator (90-140V).
PCI-1103	Isolator	15	DC output opto-isolator, switches up to 60V at 3A.
PCI-1104	Isolator	15	AC output opto-isolator, switches up to 12-140V at 3A.
PCI-1105	Isolator	15	AC/DC input opto-isolator (180-280V).
PCI-1106	Isolator	15	AC output opto-isolator (24-280V).
PCI-5001H-1	PC Platform	7435	VIPc System (100/110 VAC).
PCI-5001H-2	PC Platform	7435	VIPc System (220/240 VAC).
PCI-5002H-1	PC Platform	6445	VIPc System without monitor.
PCI-5003H-1	PC Platform	5990	VIPc System without coprocessor and with 512K RAM (100/110 VAC).
PCI-5003H-2	PC Platform	5990	VIPc System without coprocessor and with 512K RAM (220/240 VAC).
PCI-5004H-1	PC Platform	3995	VIPc System, basic version.
PCI-5005A-1	RAM	895	2 MByte RAM expansion kit for VIPc.
		595	
PCI-5006A-1	Coprocessor		80287-8 coprocessor.
PCI-5007A-1	Disk Drive	895	40 MByte (28 mS) hard disk.
PCI-5008A-1	Rack Mount	125	Rack mount hardware for VIPc base unit.
PCI-5009A-1	Cage	49	Internal disk drive mounting cage for VIPc.
PCI-5010A-1	Monitor	995	EGA monitor, table-top (100/110/120 VAC).
PCI-5010A-2	Monitor	995	EGA monitor, table-top (220/240 VAC).
PCI-5011A-1	Monitor	1495	EGA monitor, industrial rack-mount (110/120 VAC).
PCI-5011A-2	Monitor	1495	EGA monitor, industrial rack-mount (220/240 VAC).
PCI-5012A-1	Base Plate	49	Vertical-mount base plate for VIPc.
PCI-5013A-1	Plate	29	Extra front face plate for VIPc.
PCI-5014A-1	Plate	29	Extra rear face plate for VIPc.
PCI-5015A-1	Door	29	Front door without logos for VIPc.
PCI-20001C-1A	PC Carrier	325	IBM PC carrier without digital I/O.
PCI-20001C-2A	PC Carrier	425	IBM PC carrier with 32 bits of digital VO.
PCI-20002M-1	PC Module	525	16/8-channel data acquisition, A/D, analog input module.
PCI-20003M-2	PC Module	325	2-channel, 12-bit, DAC, analog voltage output module.
PCI-20003M-4	PC Module	395	2-channel, 12-bit, DAC, analog voltage or current (4-20mA) output module.
PCI-20004M-1	PC Module	225	32-bit digital I/O module.
	PC Module	325	32/16-channel analog input expander module.
PCI-20005M-1			
PCI-20006M-1	PC Module	425	1-channel, 16-bit, DAC, analog voltage output module.
PCI-20006M-2	PC Module	525	2-channel, 16-bit, DAC, analog voltage output module.
PCI-20007M-1	PC Module	225	Counter, timer, pulse generator module.
PCI-20008A-1B	Cable	69	Analog high-density, shielded cable for use with PCI-20098C-1, PCI-20024T-1, and PCI-20304T Series Euro-Style panels. Length is 4 feet.
PCI-20008A-2B	Cable	61	Analog high-density, shielded cable for use with PCI-20098C-1, PCI-20024T-1, and PCI-20304T Series Euro-Style panels. Length is 1.5 feet.
PCI-20008A-3B	Cable	65	Analog high-density, shielded cable for use with PCI-20098C-1, PCI-20024T-1, and PCI-20304T Series Euro-Style panels. Length is 3 feet.
PCI-20009A-1B	Cable	99	Digital high-density, ground-plane cable for use with PCI-20098C-1, PCI-20025T-1, and PCI-20306T Series Euro-Style panels. Length is 4 feet.
PCI-20009A-28	Cable	91	Digital high-density, ground-plane cable for use with PCI-20098C-1, PCI-20025T-1, and PCI-20306T Series Euro-Style panels. Length is 1.5 feet.
PCI-20009A-3B	Cable	95	Digital high-density, ground-plane cable for use with PCI-20098C-1, PCI-20025T-1, and PCI-20306T Series Euro-Style panels. Length is 3 feet.
DCI 20010T 1	Danal	100	16-channel analog termination panel. (Use with PCI-20012A-1 or PCI-20012A-2 cable
PCI-20010T-1	Panel	125	Telephone analog termination paner, (use with Por-20012A-1 or Por-20012A-2 cach
PCI-20010T-2	Panel	155	7-channel (differential) thermocouple termination panel with cold-junction
	Panel	125	compensation. (Use with PCI-20012A-1 or PCI-20012A-2 cable.) 16-channel digital termination panel. (Use with PCI-20013A-1 or PCI-20013A-2 cable

Model#	Туре	Price	Description
PCI-20097S-1	PC Software	3995	LABTECH Control software package.
PCI-20097S-1U	Upgrade	400	Upgrade from earlier to latest version of LABTECH Control, PCI-20097S-1.
PCI-20098C-1	PC Carrier	895	Multifunction carrier. (Use PCI-20024T/25T or some Euro-Style termination panels.)
PCI-20099S-1	PC Software	CF*	LABTECH Control Preview Demonstration Software.
PCI-20201M-1	PC Module	795	Memory expansion module for PCI-20202C-1 Smart carrier (55ns memory).
PCI-20201M-2	PC Module	1295	High-speed memory expansion module for PCI-20202C-2 Smart carrier (25ns memory).
PCI-20202C-1	PC Smart Carrier	1495	Smart carrier board with DSP and 28 MHz clock.
PCI-20202C-2	PC Smart Carrier	1995	Smart carrier board with DSP and 40 MHz clock.
PCI-20203S-1	PC Software	995	DSP Library Plus, BASIC language software.
PCI-20203S-2	PC Software	995	DSP Library Plus, C language software.
PCI-20203S-3	PC Software	995	DSP Library Plus, Turbo-Pascal software.
PCI-20203S-4	PC Software	995	DSP Library Plus, Fortran language software.
PCI-20203S-5	PC Software	2490	DSP Library plus, all four software languages above.
PCI-20204S-1	PC Software	995	DSP software development package.
PCI-20205S-1	PC Software	150	DSPview FFT analyzer software.
PCI-20206S-1	PC Software	99	DSP software drivers for hardware, BASIC language.
PCI-20206S-2	PC Software	99	DSP software drivers for hardware, "C" language.
PCI-20206S-3	PC Software	99	DSP software drivers for hardware, Turbo-Pascal language.
PCI-20206S-4	PC Software	99	DSP software drivers for hardware, Fortran language.
PCI-20207K-1	DSP Pak	1995	DSP Pak including PCI-20202C-1, PCI-20205S-1, and PCI-20019M-1A.
PCI-20207K-2	DSP Pak	2395	DSP Pak including PCI-20202C-1, PCI-20205S-1, and PCI-20023M-1.
PCI-20207K-3	DSP Pak	2895	DSP Pak including PCI-20202C-2, PCI-20205S-1, and PCI-20023M-1.

LOOK . . . GOODBYE CALORIES!

Must I Cook Differently?

No—cook your normal way. Use low heat and occasionally shake the pan. The more heat you apply, the crisper your foods will be. And dryfried food stays crisp, won't get soggy like ordinary fried food.

Does D

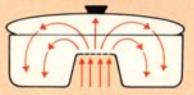

On the cor Most food minutes. Y foods stra DRY FRYII and cooks

Is D

Not at allfrying. The or fat to counter. / special No burn or sti

How DRY FRYING Works

See the "bump" in the middle of the pan? That "bump" is a Hot Air Convection Tower. It draws up cooking heat through the tiny holes ... reflects it off the lid ... and back down onto the food. Your food cooks in a "batb" of dry bot air—not wet greasy oil.
